

CSCI 342, Fall 2016, Homework # 1

Due date: Friday, Sept. 30, midnight. Submit on canvas.

Instructions: I have provided a simple html file in the file `hw01.html`, along with a couple of images. You are to create a `hw01.css` file so that the resulting page looks as close as you can make it to this:

- Do not make any changes in the `hw01.html` file!
- There are several lists in my html file. Make sure that the web page handles increasing or decreasing the number of items in the lists gracefully.
- Snarky remarks about my style choices will result in lost points.
